EDUCATION

Bachelor of Technology in Computer Science and Engineering 2023 – Present

CVR College of Engineering, Hyderabad, Telangana *CGPA: 9.33*

SKILLS

Languages: Java, JavaScript, Python, Solidity, SQL

Backend: Spring Boot, Node.js, Express.js, REST APIs, JWT, Microservices

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Bootstrap

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, AWS, Google Cloud, Vercel, Render, GitHub Actions, Unix/Linux

Core CS: Data Structures, Algorithms, Object-Oriented Programming

EXPERIENCE

Web Development Intern & Full Stack Developer **July – October 2025**

Gul Mahal Remote

- Engineered and optimized responsive web interfaces using **React.js, HTML, CSS,** and **JavaScript**, enhancing load performance and cross-device compatibility for website https://www.gulmahal.in/
- Improved page speed and interaction time by **40%** through advanced front-end optimization techniques and asset handling. Worked as a team of 5 reporting to CEO and Co-founder directly.
- Built modular, reusable components and streamlined frontend architecture, accelerating feature development by **30%**. Collaborated in **agile** sprint cycles and integrated **Google Authentication** using **Firebase.**

Open-Source Contributor - GitHub **September – November 2024**

GirlScript Summer of Code Remote

- Contributed to multiple full-stack open-source projects, building responsive UI components and scalable APIs using React.js, Node.js, and Firebase.
- Fixed bugs, optimized performance, and enhanced accessibility across repositories following best practices and code review standards participating in issue tracking, pull requests, and documentation updates.

PROJECTS

Decentralized Ethereum Wallet | React.js · Solidity · Ethers.js · MetaMask · Hardhat

- Built a **Web3** non-custodial **Ethereum wallet** enabling users to securely send, receive, and track ETH transactions via MetaMask authentication. Developed and deployed **Solidity smart contracts** on the Sepolia testnet using Hardhat and integrated Ethers.js for blockchain interaction, balance retrieval, and transaction broadcasting through a responsive React dashboard displaying real-time wallet activity.

Women's Safety Progressive Web App (PWA) | *HTML · CSS · JavaScript · Firebase · Google Maps API · Twilio API*

- Developed a mobile-first **PWA** focused on women's safety, featuring **SOS alerts**, **live location sharing**, and **automatic audio/video recording**. Integrated **Twilio SMS** for emergency alerts and **Firebase Realtime Database** for secure, real-time data storage. Planning on to include ML model trained on crowdsourced GPS data for Safe route recommendation, to integrate with **NLP** for transcribing and analyzing spoken message during Panic.

ACHIEVEMENTS

- **Finalist – Ideathon 2025**, CVR College of Engineering for prototyping a real-time women's safety application with SOS alerts and live location tracking.
- **Competitive Programming:** Achieved **LeetCode Knight (Rating 1942, Top 3%)** and **Codeforces Specialist (Rating 1593)** demonstrating strong algorithmic and problem-solving skills.
